Experience

Adatafy (Novaspect)

Software Engineer (Product & Systems Lead)

Schaumburg, Illinois

June 2022 – Present

- Led multiple 3–6 month long **digital transformation initiatives** across Pharma, Biofuels, and Utilities sectors, managing **end-to-end execution** from discovery to deployment and client onboarding.
- Defined product vision** and digital roadmaps in collaboration with Engineering, IT, and Finance, delivering **customized MES solutions** aligned to client goals.
- Facilitated Agile cadences and stakeholder syncs to resolve blockers and ensure timely, high-quality delivery across all client projects.
- Built **custom integrations** across MES, VMs, PPM and client environments using **Python and PowerShell**; reduced manual configuration time by 60% and improved deployment scalability.
- Built external **thought leadership** through 4 **technical webinars** and a **podcast series** exploring modern industrial data solutions.
- Presented at the Big Ten & Friends Utility Conference with Notre Dame leadership, highlighting **MES deployment outcomes** and impact on utility operations.
- Building internal **SME-level expertise** in a new partner platform by aligning its capabilities with common industry use cases and developing a **demo system** for sales enablement.
- Leading the development of a standardized deployment methodology to guide future client implementations and position the platform for **scalable success**.

Nvidia Corporation

Enterprise XR Technical Product Management Intern

Santa Clara, California

May 2021 – August 2021

- Developed **XR demos in Unity** using CloudXR, enabling internal testing and supporting early product discussions with the University of Utah's Medical School.
- Assisted a **Swiss VR medical training startup** with CloudXR setup and integration, helping initiate a product partnership through technical enablement and platform alignment.
- Contributed technical content to **Nvidia blog**, synthesizing insights from partner conversations to position CloudXR's value for immersive medical education.

Dolby Laboratories

Enterprise Apps Project Management Intern

San Francisco, California

January 2020 – August 2020

- Integrated a project management platform** across Finance, Marketing, and Legal teams, reducing cross-team sync meetings by 50%.
- Revamped IT PM processes by introducing Agile workflows, reducing project cycle times by 30% and improving internal coordination.
- Supported **roadmap planning** and **cross-functional requirement** gathering for enterprise IT applications, from concept through post-launch evaluation.

Education

Iowa State University | College of Engineering

Bachelor of Science in Computer Engineering with a Minor in Data Science

Ames, Iowa

Capstone: *Led product design and frontend development for a recipe app, driving 70% user retention through streamlined UX and agile iteration.*

Professional skills

- Product & Program Management:** Agile / Scrum, Jira, Confluence, Aha!, Stakeholder Communication, Product Roadmapping, User Story Writing, Feature Prioritization, Sprint Planning, Deployment Strategy
- Technical Fluency:** Python, C#, Java, SQL, PowerShell, Unity, Git, CI/CD, AWS EC2, CloudXR, Virtual Machines (VM), MES Systems (Shiftconnector, Augmentir, Imation)
- Data & Business Analysis:** Tableau, A/B Testing, SQL (Analysis), Python (Pandas, Data Analysis), User Research, KPI Development, Data-Driven Decision Making

Leadership experience

- AI for product management certification by Mind The Product 2025
- High impact presentation certification by Dale Carnegie Training 2024
- Trackside hospitality volunteer for Circuit of the Americas Formula 1 Grand Prix 2022
